

Axians Data Driven Factory

The AI assistant to optimize
factory performance

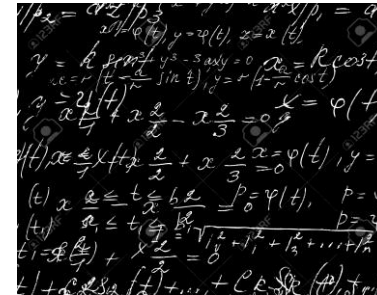

At the heart of digital
transformation

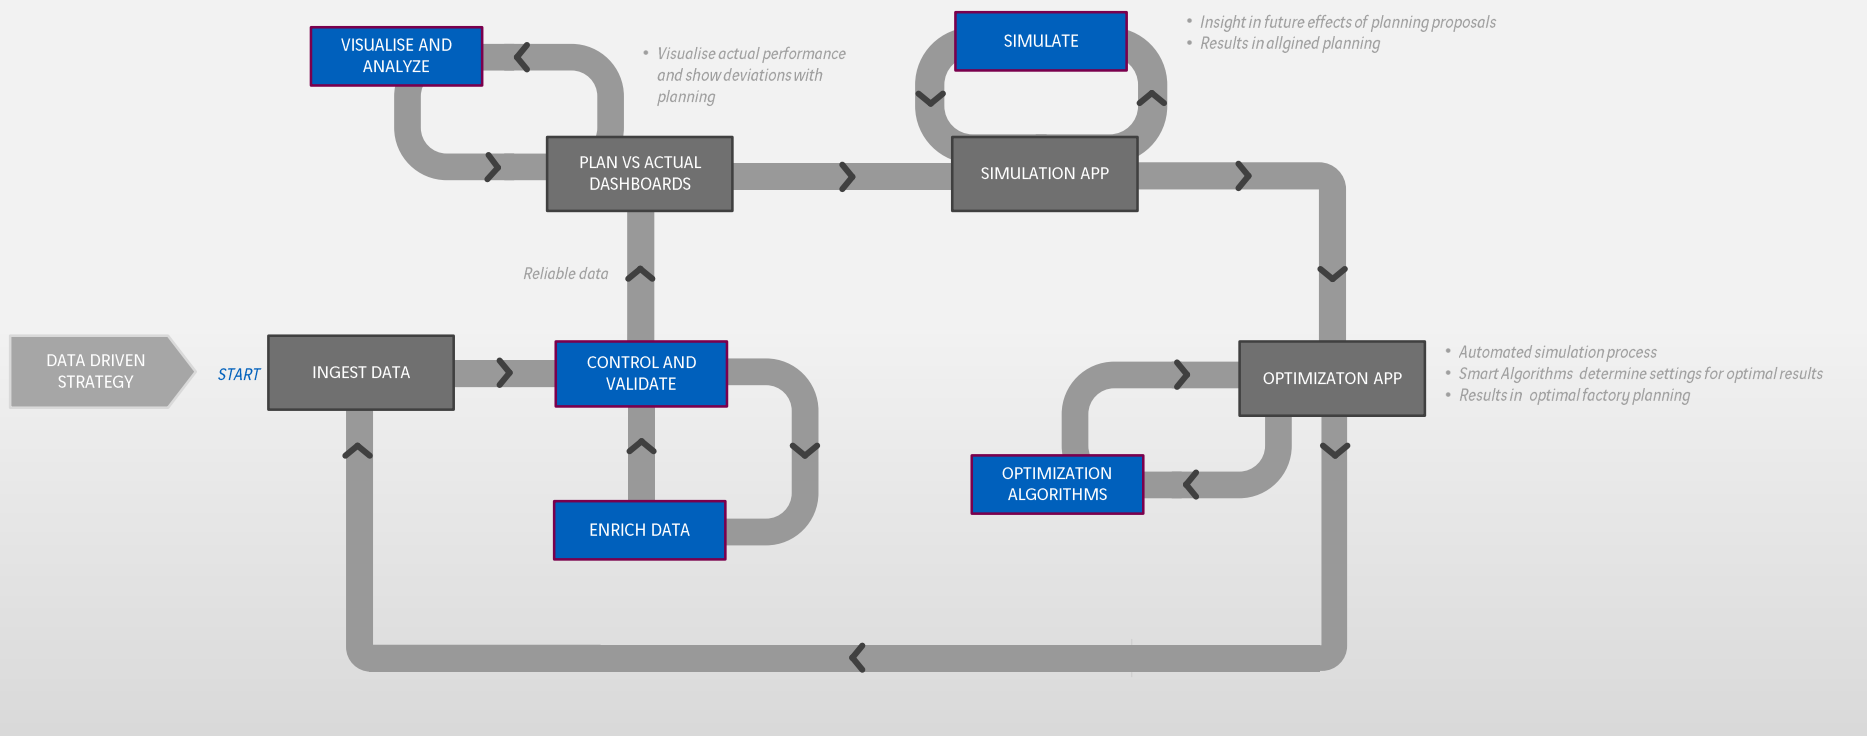

Dedicated to industrial
processes

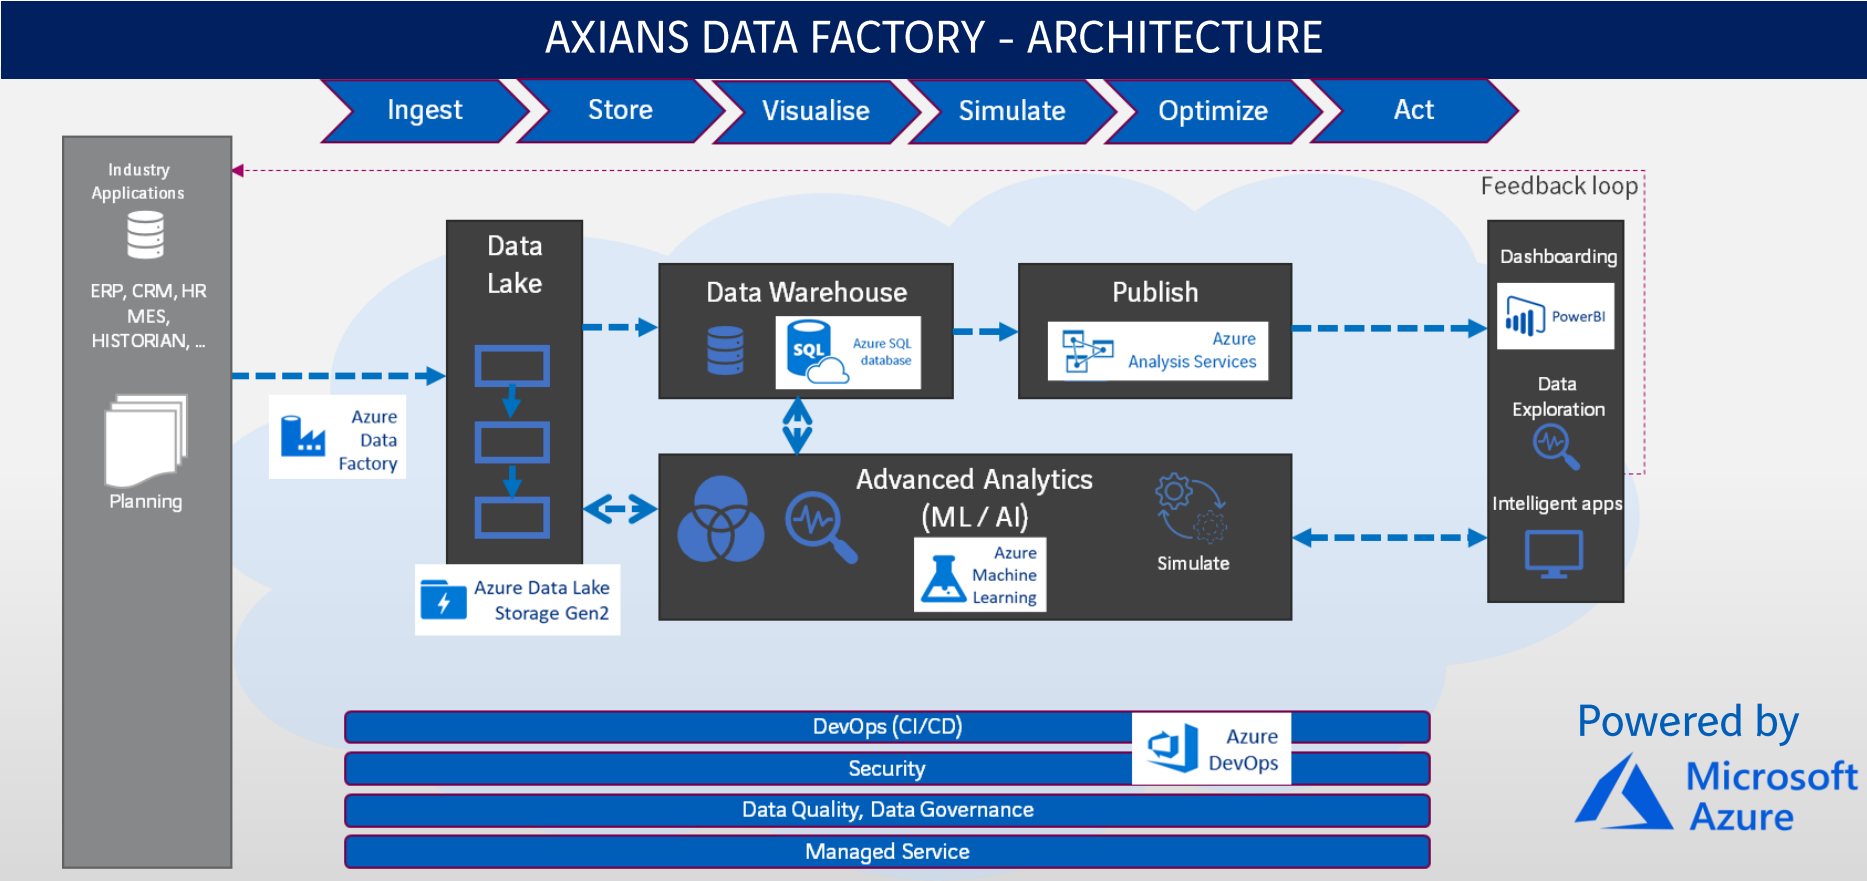

Think Big, Start Small, But Do Start

What would happen if you could know the outcome of every decision you make?

THE ROAD TO A DATA DRIVEN FACTORY

- ✓ Improved output and quality
- ✓ Data as a key role in process
- ✓ More understanding between planners and operators
- ✓ Smart operators
- ✓ Flexibility

"Through AI, we make our operators even smarter by providing them with relevant and unambiguous data. In this way, we can continuously sharpen our production processes and enhance the quality of our products."
